

INTRODUCTION

The author of this ballad of Bobbili is a certain Mallesam of the Peddada family. His name is mentioned at the end of the story, in the last two lines. His father was Nagesam. No clue is available in the text to know about his time, place of nativity, caste or profession. The meaning of the last two lines is this: 'Ye, hear the story narrated by Mallesam, son of Nagesam of the Peddada family'. It is certain that this work was composed sometime after 1757, the date of the battle of Bobbili, most probably in the 19th century. It is not known if there are any other works written by Mallesam.

Telugu folk literature, which is mainly in song, is vast in extent. Literature has meant the Telugu **kavya** literature which is produced by, and is appealing to, the well educated and well-versed few. It was only very recently that the attention of scholars and critics was diverted to this folk literature. No doubt, this ballad of Bobbili in song is one of the classics in the Telugu folk literature. Though the theme is historical, there is less of history and more of tradition. In line with the later-day Telugu poets, who adopted for their theme some story from the **Puranas** and developed it into a full-blown **prabandha**, Mallesam borrowed his theme from history and developed it into a classical folk-song-**kavya**. This work was written to immortalise the valour of the Velama ruling family of Bobbili and to sing the glory of Rao Rangarao, the hero of the ballad. The situations and incidents created by the author to depict the heroism of Rangarao and his brother, Vengalrao, and the animosity, ill-feelings and the machinations of their antagonist, Vijayaramaraju are highly interesting, though the latter's nature was not so black as painted by the author. The language employed is terse and simple, and the style vigorous and powerful. The same theme was developed into a **prabandha** in Telugu by Dittakavi Narayanakavi. It abounds in high-sounding Sanskrit words and compounds; but it lacks the simple grace of the language of this

&™þ...WÆ▷Ë Ðþ...Mæ Ü\$»ê³Æ▷Ðþ#

ballad and can justifiably be counted only next to this classical folk-song, in powerful expression, forceful style and **rasa bhavas**. Contrary to the facts of history, the author Mallesam puts an end, as in retribution, to the lives of Dubasi Lakshmanna, the Telugu interpreter to the French, and Hyderjang, diwan of Mons. Bussy, the two partners of Vijayaramaraju in the nefarious plot to put down Rangarao. There are other such deviations from history.

Bobbilikatha, the ballad on the battle of Bobbili, which was fought in 1757 between Gopalakrishna Rangarao of Bobbili and Vijayaramaraju of Vijayanagaram, in the Visakhapatnam district, is very popular in the Andhra country, especially in the Northern Circars. This is particularly popular in the East and West Godavari and Visakhapatnam districts. It continues to be sung all over the country. The Bobbili singers are a particular class of minstrels whose profession is to sing this ballad. They give performances for a pittance and engage the rapturous attention of the masses. Generally the performance is given during the night and lasts for nearly three hours. The party consists of three members, namely, the principal singer, and two chorus singers with their small kettle-drums. The principle singer, with **tambura** and cymbals in his hands, sings the ballad stepping backwards and forwards, dancing with a rustic grace and modulating the tone, and intonation in consonance with the **rasa** and **bhava** of the context. In fact, he is a mono-actor. Now he moves his audience to tears, and now he inflames them to excitement. These ballads in song are now called **Burrakathas** and **Jangamkathas**, the former because of the instruments the **kathakas** use, and the latter because of the community to which they belong.

Telugu ballads in song were and are written generally in popular colloquial style so as to be easily understood by the man in the street, and this is one of the factors which accounts for their immense popularity among the masses. The Bobbili ballad is no exception to this rule. It is in colloquial but dignified style. Its popularity can be gauged by the several redactions. I believe that the present version of the **Katha** is the original one. It mentions the several villages on the road from Hyderabad to Bejavada, from Bejavada to

Eluru, from Eluru to Rajamahendravaram and finally from Rajamahendravaram to Bobbili which are all **majilies** or halting places or places of rest after a strenuous journey. It also mentions the various local chieftaincies or Zamindaries situate on the way.

Like Vemana's verse and Srinatha's extempore stray verses this ballad grew in course of time, both in bulk and in the number of interpolated episodes. Today we have **Peda Bobbilimaharaju Katha** besides **Bobbili Katha**. I have with me a printed copy of the **Bobbili Katha**, which I bought some thirty or forty years ago from a Street-book-seller. The first four pages, along with the title page of the work have been torn and lost. Hence it is not possible to know either the date of its publication or the name of its publisher. But it is undoubtedly of the later half - or possibly of the last quarter - of the last century. This work contains 64 lines more than the one now edited. The main purpose of these additional lines appears to be the conversion of this tragedy into a comedy. The purport of the additional lines is this: After coming of the age of twelve, Venkatrayudu, son of Rangarao went to Hyderabad with a retinue of Velamas and saw the Padusha (Pachchavu). He was much pleased to know that he was the son of late Rangarao of Bobbili. The Padusha took Venkatrayudu in procession on an elephant from Hyderabad to Bobbili and placed him on his paternal throne, having given back his estate to him. These additional lines further dilate on the merit that accrues to the hearers and writers of this story.

The rivalry between the houses of Bobbili and Vijayanagaram started even with the inception of the two chieftaincies. The ancestors of these families settled themselves in the Visakhapatnam district having obtained, from the ten Nawab of Srikakulam, small estates. The early Zamindars of the Vijayanagaram family extended their authority in course of time and became very powerful in the Circars. Their chief seat of Government was shifted from Potnur to the present town of Vijayanagaram, where a fort was built in 1713-14. This estate of Vijayanagaram bordered on that of Bobbili and there was constant friction between the chiefs of the two estates. Vijayarama Gajapathiraju, who had the title of the 'King of Kalinga' (Kalinga Pedaraju)

and Gopalakrishna Rangarao were the rulers of Vijayanagaram and Bobbili respectively about the middle of the 18th century. Vijayaramaraju could not repress Rangarao on account of the nature of the terrain of the latter's estate and for want of better military equipment. The former was always in dread of Rangarao, who held the other in contempt. Vijayaramaraju waited for an opportunity to wreak vengeance on his bitter enemy, the chief of Bobbili. Such an opportunity presented itself during the rule of the French in the Circars.

From the time of the disputed succession to the throne of Hyderabad, subsequent on the death of Nizamu'l-mulk Asaf Jah in 1748, the English and the French took sides with the rival claimants. The French gained an upper hand, following the death of Nasir Jang, son of the late Nizam, in 1750 and raised Muzuffar Jang to the throne. Unfortunately, he was killed in the same year in the moment of triumph. Thereafter they espoused the cause of Salabat Jang, another son of the late Nizam, and succeeded in enthroning him. A contingent of French army under the command of Mons. Bussy was stationed at Hyderabad for supporting and guarding the interests of the Nizam whenever required. The French troops were paid from the Nizam's treasury.

The French influence on Salabat Jang was abhorrent to the great nobles of the court, who tried their utmost to break the alliance. Failing in their attempts, they put every obstacle in the way of the French. The payment of the French troops was often delayed by their tactics. Mons. Bussy got vexed with these nobles. He tried to get the Circars ceded to the French, in lieu of the cash payment, for the maintenance of his troops. At last he obtained the four circars of Kondapalli, Eluru, Rajamahendravaram and Srikakulam from Salabat Jang in 1753. Masulipatam and its adjacent territory had already been ceded to the French in 1750. Mons. Moracin the French officer, was in charge of it. After obtaining the Circars, Mons. Bussy instructed M. Moracin to take charge of the new French acquisitions. Jafar Ali, the Faujdar of Srikakulam, was against this transaction. He was unwilling to give up his charge of Srikakulam to the French. He induced Vijayaramaraju, the most powerful of the chiefs in the Circars, to join him

to obstruct Mons. Moracin's entry. But Moracin seduced Vijayaramaraju by the offer of the Rajamahendravaram and Srikakulam Circars at a very favourable rate. Finding himself deserted by his ally, Jafar Ali left his Circar with indignation and took refuge with the Marathas of Nagapur, who were then at war with Salabat Jang. The Marathas, having been persuaded by Jafar Ali, crossed the mountains, led an incursion into the coastal country and devastated the Srikakulam circar. They directed their depredations, in particular, against the territory of Vijayaramaraju. Vijayaramaraju, who was defeated at Vijayanagaram, solicited the help of Mons. Moracin, who despatched a contingent of troops in aid of the former. The combined troops of Mons. Moracin and Vijayaramaraju marched against the Marathas. A battle was fought at Tummapalla (Tumpala), near Anakapalli between the Marathas and the allies, in which the former were defeated and decamped with an immense booty already gained, ravaging the contiguous Rajamahendravaram Circar also. After obtaining the plunder, they little cared for Jafar Ali and left him to his fate. Poor Jafar Ali was obliged to submit.

In 1754 Mons. Bussy went to Masulipatam and Rajamahendravaram to settle matters in the Circars. He appointed Ibrahim Khan as the governor of Srikakulam.

After some time the relations between Mons. Bussy and Salabat Jang became much strained. A rupture ensued. So he had to entrench himself along with his troops in the gardens of Charmahal near Hyderabad until the arrival of reinforcements from Masulipatam. During these days of Bussy's trial, Vijayaramaraju of Vijayanagaram was the only Zamindar who stood by him steadfastly with assurances of his fidelity and regular payment of tribute. He helped him secretly with money also at a most critical moment. At last Mons. Bussy won the day. He was received back into favour by the Nizam.

Taking advantage of the distress of the French at Hyderabad, the Zamindars and other petty local chieftains in the Circars, with the exception of Vijayaramaraju, rejected the authority of the French and withheld the payment of tribute. Even Ibrahim Khan, governor of Srikakulam,

appointed by the French, disavowed their authority. To set matters right Mons. Bussy proceeded again to the Circars to collect the balances of rent, to put down the turbulent local chieftains, to restore order and to re-establish the authority of the French. On the 16th of November 1756 he began his march with 500 Europeans, and 4,000 sepoys from Hyderabad.

Mons. Bussy reached Rajamahendravaram on the 19th of December 1756. Hearing of the approach of the French, Ibrahim Khan, the governor of Srikakulam, fled to Aurangabad. Vijayaramaraju met Mon. Bussy at Rajamahendravaram with a force of 10,000 men. He was received with every mark of respect. He utilized this opportunity for fulfilling his long cherished wish to crush Rangarao of Bobbili. He told Mons. Bussy that Rangarao should be suppressed as he was the instigator of the disturbances in the Circars. Mons. Bussy was persuaded to attack Bobbili.

On reaching Bobbili, Mons. Bussy commanded Rangarao to quit the fort and offered him, in lieu of his estate, a more extensive territory in another part of the Circar. Rangarao took it as an insult and defied his authority. All the negotiations of Rangarao with Mons. Bussy to retain Bobbili for himself, failed. Soon after, a detachment of Bussy's sepoys was attacked in the Bobbili forests and some men were killed and more wounded. Enraged by this incident Mons. Bussy determined to expel Rangarao from the fort and capture it. Orme in his **History of Hindoostan** graphically describes the fort of Bobbili, its defences and the battle. I have quoted below the relevant passages from his work, **in extenso**.

"The province of Chicacole has few extensive plains, and its hills increase in frequency and magnitude, as they approach the vast range of mountains that bound this, and the Province of Rajahmundrum, to the north-west. The hills, and the narrower bottoms which separate them, are suffered to over-run with wood, as the best protection to the opener valleys allotted for cultivation. The Polygar (chieftain) besides his other towns and forts, has always one situated in the most difficult part of his country, which is intended as the last refuge for himself and all of

his own blood. The singular construction of this fort is adequate to all the intentions of defence amongst a people unused to cannon, or other means of battery. Its outline is a regular square, which rarely exceeds 200 yards; a large round tower is raised at each of the angles, and a square projection in the middle of each of the sides. The height of the wall is 22 feet, but of the rampart within only 12, which is likewise its breadth at top, although it is laid much broader at bottom; the whole is of tempered clay, raised in distinct layers, of which each is left exposed to the sun until thoroughly hardened, before the next is applied. The parapet raised 10 feet above the rampart, and is only three feet thick. It is indented five feet down from the top in interstices six inches wide, which are three or four feet asunder. A foot above the bottom of these interstices and battlements, runs a line of round holes, another two feet lower, and a third within two feet of the rampart. These holes are, as usual, formed with pipes of baked clay. They serve for the employment of fire-arms, arrows, and lances; and the interstices for the freer use of all these arms, instead of loop-holes, which cannot be inserted or cut in clay. The towers, the square projections in the middle, have the same parapet as the rest of the wall; and in two of the projections, on opposite sides of the fort, are gateways, of which the entrance is not in the front, but on one side, from whence it continues through half the mass, and then turns by a right angle into the place; and, on any alarm, the whole passage is choked up with trees, and the outside surrounded to some distance with a thick bed of strong brambles. The rampart and parapet are covered by a shed of strong thatch, supported by posts; the eaves of this shed project over the battlements, but fall so near, that a man can scarcely squeeze his body between; this shed is shelter both to the rampart and guards against the sun and rain. An area of 500 yards, or more, in every direction round the fort, is preserved clear, of which the circumference joins the high wood, which is kept thick, three, four, or five miles in breadth around this centre. Few of these forts permit more than one path through the wood. The entrance of the path from without is defended by a wall, exactly similar in construction and strength to one of the sides of the fort; having its round towers at the ends, and

the square projection with its gateway in the middle. From natural sagacity they never raise this redoubt on the edge of the wood; but at the bottom of a recess, cleared on purpose, and on each side of the recess, raise breast-works of earth or hedge, to gall the approach. The path admits only three men abreast, winds continually, is everywhere commanded by breast-works in the thicket, and has in its course several redoubts, similar to that of the entrance, and like that flanked by breast-works on each hand. Such were the defences of Bobbili; against which Mr. Bussy marched, with 750 Europeans, of whom 250 were horse, four field-pieces and 11,000 peons and sepoys, the army of Viziamara Raj, who commanded them in person.

"Whilst the field-pieces plied the parapet of the first redoubt at the entrance of the wood, detachments entered into the side of the recess with fire and hatchet, and began to make a way, which tended to bring them in the rear of the redoubt; and the guard, as soon as convinced of their danger, abandoned their station, and joined those in the posts behind; the same operations continued through the whole path, which was five miles in length, and with the same success, although not without loss. When in sight of the fort, Mr. Bussy divided his troops into four divisions, allotting one, with the field-piece, to the attack of each of the towers. Ranga Rao was here, with all his parentage, 250 men bearing arms, and nearly twice this number of women and children.

"The attack commenced at daybreak, on the 24th January (1757), with the field-pieces against the four towers; and the defenders, lest fire might catch the thatch of the rampart, had pulled it down. By nine O' clock, several of the battlements were broken, when all the leading parties of the four divisions advanced at the same time with scaling ladders; but, after much endeavour for an hour, not a man had been able to get over the parapet; any many had fallen wounded; other parties followed with as little success, until all were so fatigued, that a cessation was ordered, during which the field-pieces, having beaten down more of the parapet, gave the second attack more advantage; but the ardour of the defence increased with the danger. The garrison fought with the indignant ferocity of

wild beasts defending their dens and families: several of them stood as in defiance, on the top of the battlements, and endeavoured to grapple with the first ascendants, hoping with them to twist the ladders down; and this failing, stabbed with their lances, but being wholly exposed themselves, were easily shot by aim from the rear of the escalade. The assailants admired, for no Europeans had ever seen such excess of courage in the natives of Indostan, and continually offered quarter, which was always answered by the menace and intention of death: not a man had gained the rampart at two O'clock in the afternoon, when another cessation of the attack ensued; on which Ranga Rao assembled the principal men, told them that there was no hopes of maintaining the fort, and that it was immediately necessary to preserve their wives and children from the violation of Europeans, and the more ignominious authority of Viziamara Razu. A number called without distinction were allotted to the work; they proceeded, every man with a torch, his lance, and poignard, to the habitations in the middle of the fort to which they set fire indiscriminately, plying the flame with straw prepared with pitch and brimstone, and every man stabbed without remorse, the woman or child, whichsoever attempted to escape the flame and suffocation. Not the helpless infant, clinging to the bosom of its mother, save the life of either from the hand of the husband and father. The utmost excesses whether of revenge or rage, were exceeded by the atrocious prejudices which dictated and performed this horrible sacrifice. The massacre being finished, those who accomplished it returned, like men agitated by the furies, to die themselves on the walls. Mr. Law, who commanded one of the divisions, observed, whilst looking at the conflagration, that the number of the defenders was considerably diminished, and advanced again to the attack: after several ladders had failed, a few grenadiers got over the parapet, and maintained their footing in the tower until more secured the possession. Ranga Rao hastening to the defence of the tower, was in this instant killed by a musket-ball. His fall increased, if possible, the desperation of his friends; who, crowding to revenge his death, left the other parts of the ramparts bare; and the other divisions of the French troops, having advanced likewise to their

respective attacks, numbers on all sides got over the parapet without opposition: nevertheless, none of the defenders quitted the rampart, or would accept quarter; but each fell advancing against, or struggling with, an antagonist; and even when fallen and in the last agony, would resign his poignard only to death. The slaughter of the conflict being completed, another much more dreadful, presented itself in the area below: the transport of victory lost all its joy: all gazed on one another with silent astonishment and remorse, and the fiercest could not refuse a tear to the deplorable destruction spread before them. Whilst contemplating it, an old man, leading a boy, was perceived advancing from a distant recess: he was welcomed with much attention and respect, and conducted by the crowd to Mr. Law, to whom he presented the child with these words: "This is the son of Ranga Rao, whom I have preserved against his father's will." Another emotion now succeeded, and the preservation of this infant was felt by all as some alleviation to the horrible catastrophe, of which they had been the unfortunate authors. The tutor and the child were immediately sent to Mr. Bussy, who, having heard of the condition of the fort, would not go into it, but remained in his tent, where he received the sacred captives with the humanity of a guardian appointed by the strongest claims of nature, and immediately commanded patents to be prepared, appointing the son lord of the territory which he had offered the father in exchange for the districts of Bobbili; and ordered them to be strictly guarded in the camp from the malevolence of enemies.

"The ensuing night and the two succeeding days passed in the usual attentions, especially the care of the wounded, who were many; but in the middle of the third night, the camp was alarmed by tumult in the quarter of Viziamara Razu. Four of the soldiers of Ranga Rao, on seeing him fall, concealed themselves in an unfrequented part of the fort until the night was far advanced, when they dropped down the walls and speaking the

same language, passed unsuspected through the quarters of Viziamara Razu, and gained the neighbouring thickets; where they remained the two succeeding days, watching until the bustle of the camp had subsided; when two of them quitted their retreat, and having by their language again deceived those by whom they were questioned, got near the tent of Viziamara Razu; then creeping on the ground they passed under the back part, and entering the tent found him lying on his bed, alone and asleep. Viziamara Razu was extremely corpulent, insomuch that he could scarcely raise himself from his seat without assistance: the two men, restraining their very breath, struck in the same instant with their poignards at his heart; the first groan brought in a sentinel, who fired, but missed; more immediately thronged in, but the murderers, heedless of themselves, cried out, pointing to the body, "Look here! We are satisfied." They were instantly shot by the crowd, and mangled after they had fallen; but had stabbed Viziamara Razu in thirty-two places. Had they failed, the other two remaining in the forest were bound by the same oath to perform the deed or perish in the attempt.¹"

In this ballad the achievement is attributed to the daringness and valour of one hero, Tandra Papayya, the brother-in-law of Rao Rangarao.

Much interesting information about customs, manners and items of dress of the Velamas and pieces of art which were in vogue during that period lies scattered through this work. This information will be useful for the reconstruction of our social and economic history of the period.

I take this opportunity to thank Sri T. Chandrasekharan, the Curator of the Govt. Oriental Manuscripts Library, for allotting me this work to edit.

Madras,
